

Perfecting smiles

La Clinica, one of Riyadh's most specialised dental clinics, helps you achieve a flawless smile

A winning smile can be a powerful asset, but getting it through traditional braces is often a long, tricky road. Enter La Clinica, a Hittin-based dental clinic offering Saudi Arabia's top Invisalign services. Invisalign is a clear aligner system that gently moves your teeth into place. Invisible on your teeth, removable and designed to fit your fast-paced life, it lets you eat, brush and show off your smile without any of the hassle that comes with metal braces.

But what sets La Clinica truly apart is the cutting-edge technology, a patient-first approach and a highly specialised team. Speaking of, the clinic brings together the country's top Invisalign consultants, Dr. Anas Sadik, consultant Professor Ibrahim Al-Shahrani, and Dr. Mohamed Baghareeb, to Riyadh. Each holds the prestigious Diamond Apex classification, Invisalign's highest honour, which means you're getting treated by some of the very best in the field.

Patient care is front and centre here. Professor Ibrahim Al-Shahrani says, "We understand that visiting the dentist can be intimidating for some people. That's why we've designed every aspect of La Clinica to put the patient first." Advanced 3D imaging

technology even lets you see your post-treatment smile before you start, so you know exactly what to expect.

Meet the experts

Dr. Anas Sadik, a King's College London graduate, is a specialist orthodontist who has over a decade of clinical experience, combining advanced technology with expert care to achieve outstanding results.

Ibrahim Al-Shahrani, an orthodontics professor at King Khalid University, has eight years of academic and clinical expertise to provide evidence-based care as a consulting professor at La Clinica.

Dr. Mohamed Baghareeb is one of the first orthodontists to introduce the now-popular Invisalign treatment in Saudi Arabia, making him a pioneer in clear aligner therapy in the region.
